application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 14) Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).

Art Unit: 1745

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Claims 1-37, drawn to an electrode and electroactive material of an olivine structure, classified in class 429, subclass 218.1.
- II. Claims 38-41, drawn to an electrode and a single phase electroactive material of the nominal formula LiV_2O_5 , classified in class 429, subclass 231.2The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, and different effects, as the two inventions are directed to electrodes with unrelated electrode active materials.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1745

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention of Group I: If the invention of Group I is elected, then an election of a single species is required. Group I most broadly includes compounds of the general formula LiMI_{1-y}MII_yPO₄ and includes the following patentably distinct species:

Species	MI	MII
1	V	Mg, Ca, Sr, Be, Ba
2	V	Zn, Cd
3	V	Pb, Sn
4	Cr	Mg, Ca, Sr, Be, Ba
5	Cr	Zn, Cd
6	Cr	Pb, Sn
7	Mn	Mg, Ca, Sr, Be, Ba
8	Mn	Zn, Cd
9	Mn	Pb, Sn
10	Fe	Mg, Ca, Sr, Be, Ba
11	Fe	Zn, Cd

Art Unit: 1745

12	Fe	Pb, Sn
13	Со	Mg, Ca, Sr, Be, Ba
14	Со	Zn, Cd
15	Со	Pb, Sn
16	Cu	Mg, Ca, Sr, Be, Ba
17	Cu	Zn, Cd
18	Cu	Pb, Sn

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 23 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1745

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

1. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carol Chaney whose telephone number is (703) 305-
